### What is I/O Psychology?
Industrial and Organizational (I/O) psychologists contribute to an organization’s success by improving the performance and well-being of its people. An I/O psychologist researches and identifies how work-related behaviors and attitudes can be improved through hiring practices, training programs, and feedback systems. Applying psychology to help individuals have more satisfying work lives is a fulfilling vocation. Some of the business strategies that I/O psychologists assist with include:

- Recruiting, hiring, and retaining the most qualified employees
- Developing, legal, and efficient hiring practices
- Design and implement new training programs
- Increase diversity in the workforce
- Develop performance management systems
- Minimize absenteeism
- Eliminate harassment and discrimination
- Increase motivation and enhance work-life balance

### Financial Support
Research or teaching assistantships are generally available for full-time graduate students to consider doing both. The official program entry can be complete either an internship or a thesis; however, we encourage students to consider an application for an assistantship.

- Most full-time graduate students have been awarded research and/or teaching assistantships for at least part of their time in the program. Besides providing financial assistance, assistantships also offer the opportunity for students to improve their interpersonal and research skills.
- The student will usually find it advantageous to select a topical area in which a faculty member in the program has substantial research expertise.
- The master’s thesis is a professional research paper and an example of the student’s research skills and ability to write an organized report. The student will defend the completed thesis at an oral examination conducted by members of the thesis committee.
- The student will usually find it advantageous to select a topical area in which a faculty member in the program is highly knowledgeable.

### Employment Opportunities
Employment opportunities for I/O psychologists include both public and private sector jobs in areas such as:

- Personnel research
- Wage and salary administration
- Human resource development
- Statistics
- Personnel management
- Job analysis
- Selection and placement
- Training and development
- Organizational development
- Performance evaluation

### Coursework
Students enrolled in the I/O concentration at ECU complete a total of 45 semester hours of coursework. Students may choose to complete either an internship or a thesis; however, we encourage students to consider doing both. The official program entry can be found in the ECU Graduate Catalog.

### Application and Admission
Admission to the I/O program is contingent upon meeting all requirements of the ECU Graduate School and being recommended by a committee of the Department of Psychology. Application materials can be downloaded online at [https://psychology.ecu.edu/graduate/applications](https://psychology.ecu.edu/graduate/applications). Note that the ECU Department of Psychology Supplemental Application is a required portion of your application.

A combination of GRE scores, grade point average, references, and other supplemental materials is used in making recommendations for admission.

All application materials should be submitted by March 1st. Students will begin their graduate work in the fall semester.

### ECU I/O Psychology Faculty

#### Jennifer Bowler, Ph.D.
**Associate Professor**
Research Interests:
- Implicit measures of personality
- Social, political, and cultural influences on personality

#### Mark Bowler, Ph.D.
**Associate Professor**
Research Interests:
- Leadership development
- Employee creativity
- Executive coaching

#### Karl Wuenesch, Ph.D.
**Professor & ECU Scholar-Teacher**
Research Interests:
- Developmental psychology
- Aggressive behavior

#### Shahnaz Aziz, Ph.D.
**Associate Professor & I/O Program Director**
Research Interests:
- Employee health & well-being
- Workplace bullying
- Work-life balance
- Work stress

#### Alex Schoemann, Ph.D.
**Associate Professor**
Research Interests:
- Implicit measures of personality
- Social, political, and cultural influences on personality

### ECU I/O Graduate Students

#### 2nd Year Students

#### 1st Year Students

### Internship and Thesis

Students may choose to complete an internship or a thesis or both.

#### Internship
- Internships provide students with an opportunity to apply skills learned through coursework and to acquire new skills in an organizational setting.
- Placements occur during the summer following the first year of coursework.
- Typically, interns are placed on the organization’s payroll.
- Relocation is sometimes necessary for the summer internship.

#### Thesis
- The master’s thesis is a professional research paper and an example of the student’s research skills and ability to write an organized report. The student will defend the completed thesis at an oral examination conducted by members of the thesis committee.
- The student will usually find it advantageous to select a topical area in which a faculty member in the program has substantial research expertise.
